BAYSWATER JEWISH CENTER, CORNER HEALY AVE. & DICKENS ST.

Speaker:

Commanding Officer 101 Precinct

Captain Timothy P. Schultz

PRESIDENT'S MESSAGE

Our first meeting of the new season will take place on the 16th of October. It is always nice to see you and find out what's new in the neighborhood and what's on our minds. We all know communicating is essential. We know what flooding is. We know what safety is. Speaking out is our only asset. So please join us. Of course our 101 is always with us and other elected officials will be present. Hope to see YOU.

Sincerely,
Enid Glabman

Everyone is welcome. It is a good community resource. The senior center provides a place to go to and share activities and a wholesome meal besides. It's well worth becoming part of the center.

SPOTTED LANTERNFLY

[https://www.nycgovparks.org/trees/spot-
ted-lanternfly-infestation](https://www.nycgovparks.org/trees/spot-
ted-lanternfly-infestation)

Spotted lanternfly (*Lycorma delicatula*-SLF) is an invasive planthopper, first discovered in New York City in July 2020. While it can infest trees, it is not considered a widespread threat to our city's forests. However, it is a significant threat to a wide range of agricultural crops including walnut, grapes, hops, apples, blueberries, and stone fruits. The Tree of Heaven (*Ailanthus altissima*) is its preferred host tree and is required for its reproduction. SLF has the potential of damaging natural areas and becoming a nuisance in landscapes.

The spotted lanternfly does not typically kill trees, it infests. Although it can weaken a tree's natural defenses (making it vulnerable to other pests and diseases), spotted lanternflies are mostly a threat to agricultural crops.
